Forecast For Northwest England
Issued by Met Office Exeter
at 1600 on Monday 18 Jan 2021

++ Valid for broadcast between 1800 and 0600

Headline:
Short lived dry spells change to persistent rain for all.

This Evening and Tonight:
A relatively dry early evening for most, however, during the late evening persistent rain moves in from the southwest, covering the entire region by night and lasting until morning. Frequently heavy downpours. Winds easing overnight for most. Minimum temperature 4 deg C (39 deg F).

Tuesday:
A wet day through out. Near continuous heavy rain falls across the region, particularly over hills where, combined with snow melt, is likely to lead to flooding in places. Maximum temperature 10 deg C (50 deg F).

Outlook for Wednesday to Friday:
Colder conditions on Wednesday with further spells of heavy rain, possibly wintry over high ground. Thursday and Friday will see scattered showers and some clear spells, as cold conditions continue.
